Lucas Martín Perez
Front End Developer / REACT / APEX

I am a passionate professional who enjoys challenges and constant innovation. I stand out for my ability to learn quickly and adapt to the necessary changes and languages. I have a knack for teamwork and aspire to assume leadership roles in the coming years. I am drawn to project architecture, order, and efficiency in everything I do..

EXPERIENCE

Front End dev
01/23 - 06/23
Jobly APP

The job consisted of starting a project from scratch for a neighborhood business. It was a WebApp for product entry and sales registration in a local store. Within the team, my responsibilities included:Implementation of the design created by UI/UX.Implementation and testing of the REST API and connection with the BackEnd.Code structuring and deployment. The project was developed using REACT.JS.

Front End dev
10/21 - 12/22
Freelance

In the first year, I assisted a partner in completing their work. Currently, I have my own clients. The jobs I undertake are varied, but there are two main categories: personal landing pages for professionals and functional Web Apps for specific activities. I handle the entire process, from client communication to the delivery of the final product.

Developer
06/20 - 08/21
Verde Oliva

Verde Oliva is a company dedicated to the marketing of Dietetics products through a web platform. My work is divided into two areas: Firstly, the development and maintenance of the website and the online store. Secondly, the administration of orders, purchases, and logistics for deliveries. We use Microsoft Excel for data recording, and we have created a Python platform for processing information and obtaining statistics.

EDUCACIÓN

Systems
03/19 - actualidad
UNLA
Both the Bachelor's degree and the intermediate title in University Programmer Analyst provide students with the skills in the development, planning, design, execution, and control of complex computer systems. In this career, I was able to acquire a solid foundation in programming and software architecture.
